Glast table

FOSAM

The GLAST range offers simple classic design flexible tables to enhance all workplaces.

Designed by Michele Sbrogiò

The table's elegant lines are further resolved with finely bevelled edges and rounded corners. Durable and practical, the table is easily appropriate for an executive office, reception area or dining room, comfortably seating six, or eight in a pinch. Made in Italy.

You will be impressed by its cool, clean beauty and clever details like the precision-tooled hardware visible through the glass tabletop. Its lightly scaled simplicity suits any context: use it as a display table in a retail environment or as a conference table in the office

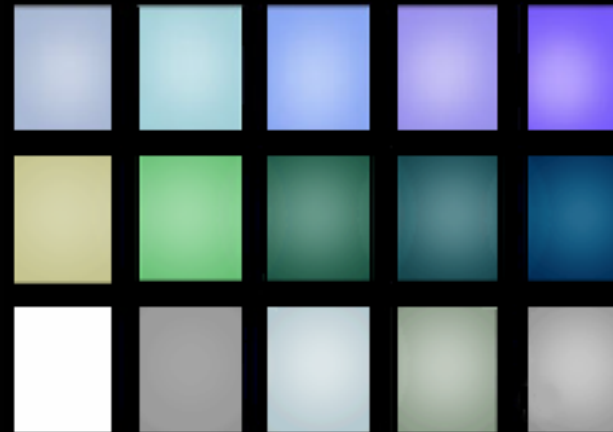

The glass tops of Glast desks are available as standard in transparent, matt white, matt black finishes and in any other colours

Fosam Glast offers you the right to choose the colour of your glass. Depending on your mood and your tastes, you can really feel comfortable with a personalized desk.

Fosam uses painted glass or strips, depending on your will.

Our glass tables will make your office light and airy, and give an instant modern look.

Completely see-through, glass furniture gives the illusion of space and brightens up a room by reflecting natural light.

Sizes range from 1800mm > 3000mm, in rectangular, oval, D-end etc.

In the office, **Fosam** 'glast' tables make a strong design statement in reception areas, conference rooms and other meeting areas. Our desks provide a great-looking, hard-working environment for the productive office.

Glass, a material of light and transparency.
Steel, a material of solidity and substance.
The materials used in the Glast managerial table hold the same values that should inspire the actions of every professional.

The range can be seen in our City Showroom.
